

## News Release for BJ Metro Line 5

### Siemens Contributed to the Olympics Again

Recently, the result of the bidding on the Fire Control System and Branch Switch Project of the Beijing Subway Line 5, which is considered as the very important construction project of Beijing in 2005, and has attracted lots of attention from the public, has been published. The Olympic Games Branch (OGB) of Siemens Ltd. China finally won the two orders which worth 107 million yuan RMB, among which the Fire Control System (SBT) values as 33.34 million yuan RMB, and the Branch Switch Project (TS) values as 73.95 million yuan RMB. The Fire Control System order is the biggest single order in this field that SBT has ever obtained not only in China, but also worldwide. It also indicates that another business group under Siemens has formally entered the Beijing Subway industry, with the effort of OGB.

The Beijing Subway Line 5, which is 27,7 km in length, starts at Song Jia Zhuang of Fengtai District, the south of the city, and leads to the north of Tai Ping Zhuang of Changping District, which is in the north of the city. It will become the important transportation passage connecting the north and south of the city. The project of Beijing Subway Line 5 is also one of the key transportation projects implemented by the Beijing Government as it is a commitment to the International Olympics Committee.

Both the technical support from various business groups and the top management of Siemens company have contributed to the success of OGB on this project. With the joint effort from all aspects of the company, it can be expected that OGB can obtain more orders and Siemens can contribute more to the Olympic Games.

Let's work hard together!
