

SIEMENS

Totally Integrated Automation

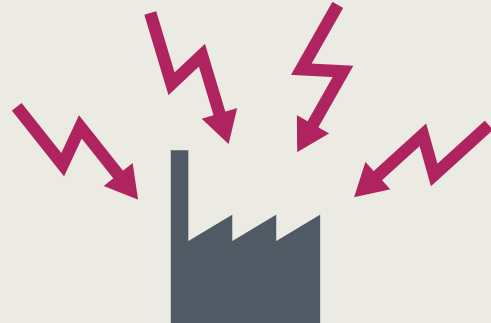

Industrial Security

The **digitization of automation** is progressing steadily.

Today Ethernet connections extend **all the way to the field level.**

This offers many **benefits**,

while also entailing **risks**.

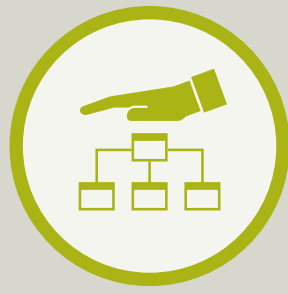

Industrial Security

with Totally Integrated Automation provides **comprehensive protection** for:

Plant security

+

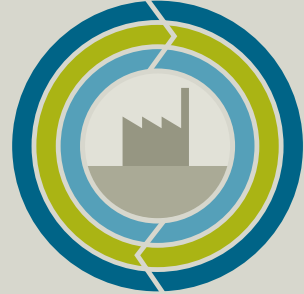

Network security

+

System integrity

=

Integrated security concept

The **security functionalities** are integrated in the automation components.

Integration into the TIA Portal also ensures **fast** and **easy** engineering.

This is how you protect **your knowledge** and ensure the **availability** of the plant.

efficient

reliable
