

Horizontal and vertical integration lead to measurable benefits

Integrated Drive System@Lafarge (cement plant)

Customer: Lafarge Cement Plant, Hungary

Order Building the most modern cement factory in Europe

Solution Complete solution of drive technology and automation components for identical set up of lines:

- Energy supply
- Medium-voltage switchgears
- Transformers
- Low-voltage power distribution/MCC
- Frequency converters
- CEMAT automation system
- Software applications
- Fully automated plant operation
- Building technology components
- Installation and commissioning

Customer benefits

- Innovative drive concept
- Reduced maintenance costs
- Higher efficiency
- Substantial energy savings
